SUMMARY

Full-stack engineer focused on building and shipping product features end-to-end. 3 years of experience developing scalable web applications, automation systems, and AI-powered tools using Next.js, TypeScript, and Node.js. Strong focus on rapid execution, ownership, and solving real business problems through engineering.

SKILLS

Frontend	React, Next.js, TypeScript, Tailwind CSS
Backend	Node.js, Express.js, REST APIs, MongoDB
AI	OpenAI API, RAG, Vector Embeddings, Prompt Engineering (Claude Code, Codex)
Tools	n8n, Webflow, Figma, Ahrefs, Zoho, GoHighLevel, Clay CRM

EXPERIENCE

Full-Stack Engineer Black Pagoda Advisors	April 2024 – Present <i>Remote, USA</i>
---	--

- Built and shipped production-ready features end-to-end using Next.js, TypeScript, and Node.js across multiple client products
- Developed scalable backend APIs and data workflows using Node.js and MongoDB to support business-critical operations
- Designed and implemented lead capture and qualification funnels using form-based systems integrated with GoHighLevel and Zoho, improving lead tracking and reducing manual follow-up
- Automated internal and marketing workflows using n8n, reducing repetitive operational work
- Improved organic search performance across multiple websites by implementing technical SEO and automation strategies
- Integrated OpenAI APIs into internal tools and workflows to automate content generation and enhance product capabilities

Full-Stack Developer Intern Afame Technologies	Feb 2024 – March 2024 <i>Remote, India</i>
--	---

- Built and shipped features across frontend and backend using the MERN stack

Full-Stack Developer Intern Business Web Solutions Inc.	April 2023 – June 2023 <i>Remote, India</i>
---	--

- Worked across frontend and backend systems using MERN stack and Python to deliver production features

PROJECTS

Lilly — AI Mental Health Companion	Live — GitHub
---	---

Full-stack AI wellness app built with Next.js, TypeScript, and MongoDB, featuring real-time GPT-powered chat, private journaling, and mood tracking.

- Implemented RAG from scratch — journal entries are embedded using OpenAI's `text-embedding-3-small`, stored as vectors in MongoDB, and retrieved via cosine similarity to inject personalised context into every GPT prompt
- Built JWT authentication, bcrypt password hashing, and per-user data isolation end-to-end
- Designed an AI mood analysis pipeline that classifies emotional tone from chat messages and visualises trends on an interactive calendar

Smart Indoor Localisation using LiFi — Academic Project

Developed an Android application integrated with LiFi-based lighting system for indoor navigation.

EDUCATION

B.Tech in Electronics and Communication Engineering	6.98 CGPA
APJ Abdul Kalam Technological University	
Higher Secondary (Science Group)	91%
Kerala State Board of Secondary Education	

CERTIFICATIONS

- IBM Full-Stack Software Developer Professional Certificate ([View](#))
- Google UX Design Professional Certificate ([View](#))
